1   Cluster-based scalable network services
Armando Fox, Steven D. Gribble, Yatin Chawathe, Eric A. Brewer, Paul Gauthier
October 1997 **ACM SIGOPS Operating Systems Review , Proceedings of the sixteenth ACM symposium on Operating systems principles SOSP '97**, Volume 31 Issue 5
Publisher: ACM Press
Full text available: 📄 pdf(2.42 MB)   Additional Information: full citation, references, citings, index terms

2   Multimedia authoring: Linking multimedia presentations with their symbolic source documents: algorithm and applications
Berna Erol, Jonathan J. Hull, Dar-Shyang Lee
November 2003 **Proceedings of the eleventh ACM international conference on Multimedia**
Publisher: ACM Press
Full text available: 📄 pdf(472.17 KB)   Additional Information: full citation, abstract, references, index terms

An algorithm is presented that automatically matches images of presentation slides to the symbolic source file (e.g., PowerPoint™ or Acrobat™) from which they were generated. The images are captured either by tapping the video output from a laptop connected to a projector (by taking a picture of what's displayed on the screen in a conference room. The matching algorithm extracts features from the image data, including OCR output, edges, projection profile and layout and determine ...

3   Fast detection of communication patterns in distributed executions
Thomas Kunz, Michiel F. H. Seuren
November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**
Publisher: IBM Press
Full text available: 📄 pdf(4.21 MB)   Additional Information: full citation, abstract, references, index terms

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with th

desired overview of the application. In our experience, such tools display repeated occurrences non-trivial commun ...

4 Image Retrieval from the World Wide Web: Issues, Techniques, and Systems

M. L. Kherfi, D. Ziou, A. Bernardi

March 2004 **ACM Computing Surveys (CSUR)**, Volume 36 Issue 1

Publisher: ACM Press

Full text available: pdf(294.13 KB)　　　Additional Information: full citation, abstract, references, index terms

With the explosive growth of the World Wide Web, the public is gaining access to massive amounts of information. However, locating needed and relevant information remains a difficult task, whether the information is textual or visual. Text search engines have existed for some years now and have achieved a certain degree of success. However, despite the large number c images available on the Web, image search engines are still rare. In this article, we show that ir order to allow people to profi ...

5 Shape-based retrieval and analysis of 3D models

Thomas Funkhouser, Michael Kazhdan

August 2004 **Proceedings of the conference on SIGGRAPH 2004 course notes GRAPH '04**

Publisher: ACM Press

Full text available: pdf(12.56 MB)　　　Additional Information: full citation, abstract

Large repositories of 3D data are rapidly becoming available in several fields, including mechani CAD, molecular biology, and computer graphics. As the number of 3D models grows, there is ar increasing need for computer algorithms to help people find the interesting ones and discover relationships between them. Unfortunately, traditional text-based search techniques are not always effective for 3D models, especially when queries are geometric in nature (e.g., find me objects that fit into thi ...

6 The architecture of robust publishing systems

Marc Waldman, Aviel D. Rubin, Lorrie Faith Cranor

November 2001 **ACM Transactions on Internet Technology (TOIT)**, Volume 1 Issue 2

Publisher: ACM Press

Full text available: pdf(680.21 KB)　　　Additional Information: full citation, abstract, references, index terms

The Internet in its present form does not protect content from censorship. It is straightforward i trace any document back to a specific Web server, and usually directly to an individual. As we discuss below, there are valid reasons for publishing a document in a censorship-resistant manr Unfortunately, few tools exist that facilitate this form of publishing. We describe the architecture robust systems for publishing content on the Web. The discussion is in the context of Publius, a: that ...

8 Chimera: hypermedia for heterogeneous software development enviroments

Kenneth M. Anderson, Richard N. Taylor, E. James Whitehead

July 2000 **ACM Transactions on Information Systems (TOIS)**, Volume 18 Issue 3

Publisher: ACM Press

Full text available: pdf(864.32 KB)   Additional Information: full citation, abstract, references, citings, index terms

Emerging software development environments are characterized by heterogeneity: they are composed of diverse object stores, user interfaces, and tools. This paper presents an approach providing hypermedia services in this heterogeneous setting. Central notions of the approach include the following: anchors are established with respect to interactive views of objects, rathe than the objects themselves; composable, n-ary links can be established between a ...

11 WebExpress: a client/intercept based system for optimizing Web browsing in a wireless environment

Barron C. Housel, George Samaras, David B. Lindquist

December 1998 **Mobile Networks and Applications**, Volume 3 Issue 4

Publisher: Kluwer Academic Publishers

Full text available: pdf(338.35 KB)   Additional Information: full citation, abstract, references, citings, index terms

This paper describes an application model and software technology that makes it possible to rur World Wide Web applications in wide area wireless networks. Web technology in conjunction wit today's mobile devices (e.g., laptops, notebooks, personal digital assistants) and the emerging wireless technologies (e.g., digital cellular, packet radio, CDPD) offer the potential for unprecedented access to data and applications by mobile workers. Yet, the limited bandwidth, high latency, high cost, ...

12 Query Language for Semantic Web: RQL: a declarative query language for RDF

Gregory Karvounarakis, Sofia Alexaki, Vassilis Christophides, Dimitris Plexousakis, Michel Scholl
May 2002   **Proceedings of the 11th international conference on World Wide Web**
Publisher: ACM Press
Full text available: pdf(352.14 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

> Real-scale Semantic Web applications, such as Knowledge Portals and E-Marketplaces, require t
> management of large volumes of metadata, i.e., information describing the available Web conte
> and services. Better knowledge about their meaning, usage, accessibility or quality will
> considerably facilitate an automated processing of Web resources. The Resource Description

15 Interacting in chaos

Dan R. Olsen
September 1999 **interactions**, Volume 6 Issue 5
Publisher: ACM Press
Full text available: pdf(587.03 KB)
html(50.47 KB)   Additional Information: <u>full citation</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

16 Playing experience: From remote media immersion to Distributed Immersive Performance

A. A. Sawchuk, E. Chew, R. Zimmermann, C. Papadopoulos, C. Kyriakakis

November 2003 **Proceedings of the 2003 ACM SIGMM workshop on Experiential telepresen(**

Publisher: ACM Press

Full text available: pdf(378.71 KB)   Additional Information: full citation, abstract, references, index terms

We present the architecture, technology and experimental applications of a real-time, multi-site interactive and collaborative environment called Distributed Immersive Performance (DIP). The objective of DIP is to develop the technology for live, interactive musical performances in which the participants - subsets of musicians, the conductor and the audience - are in different physic locations and are interconnected by very high fidelity multichannel audio and video links. DIP is specific r ...

Keywords: information interfaces and presentation, music performance, real-time interaction, remote collaboration

17 Embedded video in hypermedia documents: supporting integration and adaptive control

Dick C. A. Bulterman

October 1995 **ACM Transactions on Information Systems (TOIS)**, Volume 13 Issue 4

Publisher: ACM Press

Full text available: pdf(2.41 MB)   Additional Information: full citation, abstract, references, citings, index terms

As the availability of digital video becomes commonplace, a shift in application focus will occur from merely accessing video as an independent data stream to embedding video with other multimedia data types into coordinated hypermedia presentations. The migration to embedded video will present new demands on application and support environments: processing of any on piece of video data will depend on how that data relates to other data streams active with ...

Keywords: adaptive control, embedded video, hypermedia documents, multimedia, synchronization, video presentation

18 Pervasive computing: Modeling service-based multimedia content adaptation in pervasive computing

Girma Berhe, Lionel Brunie, Jean-Marc Pierson

April 2004 **Proceedings of the 1st conference on Computing frontiers**

Publisher: ACM Press

Full text available: pdf(691.71 KB)   Additional Information: full citation, abstract, references, index terms

Pervasive computing applications allow users to access information from anywhere while traveli and using variety of devices. Heterogeneity and limitation of resources involved in this applicati demand adaptation of content according to the current context (device, user, network etc.). The dynamic nature of adaptation mechanisms together with emerging opportunities of Web Service technology provides new approach of adaptation which is service-based. While this approach would provide a valuabl ...

Keywords: content adaptation services, media transformation, multimedia content delivery, pervasive computing

19 Principled design of the modern Web architecture

Roy T. Fielding, Richard N. Taylor

May 2002 **ACM Transactions on Internet Technology (TOIT)**, Volume 2 Issue 2

Publisher: ACM Press

Full text available: pdf(335.47 KB)   Additional Information: full citation, abstract, references, citings, index terms

The World Wide Web has succeeded in large part because its software architecture has been designed to meet the needs of an Internet-scale distributed hypermedia application. The moder Web architecture emphasizes scalability of component interactions, generality of interfaces, independent deployment of components, and intermediary components to reduce interaction latency, enforce security, and encapsulate legacy systems. In this article we introduce the Representational State Transfer (REST) arc ...

20 <u>A Parallel Implementation of 4-Dimensional Haralick Texture Analysis for Disk-Resident Image Datasets</u>
Brent Woods, Bradley Clymer, Joel Saltz, Tahsin Kurc
November 2004 **Proceedings of the 2004 ACM/IEEE conference on Supercomputing**
Publisher: IEEE Computer Society
Full text available: pdf(386.59 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>

Texture analysis is one possible method to detect features in biomedical images. During texture analysis, texture related information is found by examining local variations in image brightness. dimensional (4D) Haralick texture analysis is a method that extracts local variations along space and time dimensions and represents them as a collection of fourteen statistical parameters. However, the application of the 4D Haralick method on large time-dependent 2D and 3D image datasets is hindered by ...

21 Design and realization of an interactive multimedia server in education
K. Coninx, B. Daems, F. Van Reeth, E. Flerackers
June 1997   **ACM SIGCSE Bulletin , Proceedings of the 2nd conference on Integrating technology into computer science education ITiCSE '97**, Volume 29 Issue 3
Publisher: ACM Press
Full text available: 📄 pdf(663.09 KB)   Additional Information: full citation, abstract, references, index terms

The European project ELECTRA is concerned with the introduction of multimedia / telematics support to enhance the accessibility (local, regional and international) of learning material and t promote collaborative work. For the purpose of this paper we concentrate on two workpackages the Limburg University Centre. The Interactive Multimedia Server workpackage focuses on the design of a generic platform for the integration of different types of information related to the learning process. Spec ...

22 Digital preservation: A semi-automated digital preservation system based on semantic web services
Jane Hunter, Sharmin Choudhury
June 2004   **Proceedings of the 4th ACM/IEEE-CS joint conference on Digital libraries**
Publisher: ACM Press
Full text available: 📄 pdf(357.74 KB)   Additional Information: full citation, abstract, references, citings, index terms

This paper describes a Web-services-based system which we have developed to enable organizations to semi-automatically preserve their digital collections by dynamically discovering and invoking the most appropriate preservation service, as it is required. By periodically comparing preservation metadata for digital objects in a collection with a software version registry, potential object obsolescence can be detected and a notification message sent to the relevant agent. By making preservation so ...

29 Efficient and flexible Web access to art-historical image collections
Matthias Wagner, Stefan Holland, Werner Kießling
March 2000 **Proceedings of the 2000 ACM symposium on Applied computing - Volume 2**
Publisher: ACM Press
Full text available: pdf(646.03 KB)   Additional Information: <u>full citation</u>, <u>references</u>, <u>index terms</u>

Keywords: Web access, applications in the arts and humanities, format optimization, image databases, multimedia delivery

30 Characterizing a national community web
Daniel Gomes, Mário J. Silva
August 2005 **ACM Transactions on Internet Technology (TOIT)**, Volume 5 Issue 3
Publisher: ACM Press
Full text available: pdf(364.77 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>index terms</u>

This article presents a characterization of the community Web of the people of Portugal. We defined criteria for delimiting this Web based on our past experience of crawling pages related t Portugal and collected over 3.2 million documents from 46,000 sites satisfying those criteria. Οι characterization was derived from this crawl. We describe the rules that we established for defining the boundaries of this community Web and the methodology used to gather statistics.

Statistics cover the numb ...

Keywords: Portuguese Web, Web characterization, Web communities, Web measurements

31 <u>On proxy agents, mobility, and web access</u>

Anupam Joshi

December 2000 **Mobile Networks and Applications**, Volume 5 Issue 4

Publisher: Kluwer Academic Publishers

Full text available: pdf(201.52 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

With the emerging need for ubiquitous access to information, web access from mobile clients is gaining increasing importance. Unfortunately, the underlying protocols of the web are not designed to support operations from a resource poor platform in a low bandwidth, disconnectior prone environment. Efforts to create systems to support mobile browsing have typically been proxy‐based. However, such solutions have recently been criticized due to their non‐scalability. Developments in ad ...

32 <u>The case for persistent-connection HTTP</u>

Jeffrey C. Mogul

October 1995 **ACM SIGCOMM Computer Communication Review , Proceedings of the conference on Applications, technologies, architectures, and protocols for computer communication SIGCOMM '95**, Volume 25 Issue 4

Publisher: ACM Press

Full text available: pdf(1.68 MB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

The success of the World-Wide Web is largely due to the simplicity, hence ease of implementati of the Hypertext Transfer Protocol (HTTP). HTTP, however, makes inefficient use of network anc server resources, and adds unnecessary latencies, by creating a new TCP connection for each request. Modifications to HTTP have been proposed that would transport multiple requests over each TCP connection. These modifications have led to debate over their actual impact on users, servers, and on the net ...

33 <u>Ubiquitous hypermedia: Integrating the web and the world: contextual trails on the move</u>

Frank Allan Hansen, Niels Olof Bouvin, Bent G. Christensen, Kaj Grønbæk, Torben Bach Pedersen, Jevgenij Gagach

August 2004 **Proceedings of the fifteenth ACM conference on Hypertext and hypermedia HYPERTEXT '04**

Publisher: ACM Press

Full text available: pdf(3.41 MB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

This paper presents applications of HyCon, a framework for context aware hypermedia systems The HyCon framework encompasses annotations, links, and guided tours associating locations a RFID- or Bluetooth-tagged objects with maps, Web pages, and collections of resources. The use created annotations, links and guided tours, are represented as XLink structures, and HyCon introduces the use of XLink for the representation of recorded geographical paths with annotatic and links. The HyCon archi ...

Keywords: SVG, XLink, context aware hypermedia, open hypermedia

34 <u>The VuSystem: a programming system for visual processing of digital video</u>

C. Lindblad, D. Wetherall, D. Tennenhouse

October 1994 **Proceedings of the second ACM international conference on Multimedia**

Publisher: ACM Press

Full text available: pdf(808.12 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

In computer-participative multimedia applications, the computer not only manipulates media, b also digests it and performs independent actions based on media content. We present a design approach that applies the programming techniques of visualization systems to the development computer-participative multimedia applications. We describe an implementation based on this approach, and report performance measurements that demonstrate it is practical. We conclude describing three applic ...

35 An architectural approach to building systems from COTS software components

Mark R. Vigder, John Dean

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

Publisher: IBM Press

Full text available: pdf(253.02 KB)   Additional Information: full citation, abstract, references, citings, index terms

As software systems become increasingly complex to build developers are turning more and mo to integrating pre-built components from third party developers into their systems. This use of Commercial Off-The-Shelf (COTS) software components in system construction presents new challenges to system architects and designers. This paper is an experience report that describes issues raised when integrating COTS components, outlines strategies for integration, and preser some informal rules we have ...

36 Trustworthy 100-year digital objects: durable encoding for when it's too late to ask

H. M. Gladney, R. A. Lorie

July 2005   **ACM Transactions on Information Systems (TOIS),** Volume 23 Issue 3

Publisher: ACM Press

Full text available: pdf(1.04 MB)   Additional Information: full citation, abstract, references, index terms

How can an author store digital information so that it will be reliably intelligible, even years late when he or she is no longer available to answer questions? Methods that *might* work are not go enough; what is preserved today should be reliably intelligible whenever someone wants it. Prio proposals fail because they generally confound saved data with irrelevant details of today's information technology---details that are difficult to define, extract, and save completely and accurate ...

Keywords: Long-term digital preservation, encoding

37 Industrial sessions: big data: The SDSS skyserver: public access to the sloan digital sky server data

Alexander S. Szalay, Jim Gray, Ani R. Thakar, Peter Z. Kunszt, Tanu Malik, Jordan Raddick, Christopher Stoughton, Jan vandenBerg

June 2002   **Proceedings of the 2002 ACM SIGMOD international conference on Managemer of data**

Publisher: ACM Press

Full text available: pdf(1.48 MB)   Additional Information: full citation, abstract, references, citings, index terms

The SkyServer provides Internet access to the public Sloan Digital Sky Survey (SDSS) data for both astronomers and for science education. This paper describes the SkyServer goals and architecture. It also describes our experience operating the SkyServer on the Internet. The SDS data is public and well-documented so it makes a good test platform for research on database algorithms and performance.

38 Ontologies: A lightweight ontology repository

Jin Pan, Stephen Cranefield, Daniel Carter

July 2003   **Proceedings of the second international joint conference on Autonomous agen and multiagent systems**

Publisher: ACM Press

Full text available: 📄 pdf(380.24 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>index terms</u>

Multi-agent systems rely on shared ontologies to enable unambiguous communication between agents. An ontology defines the terms or vocabularies used within messages encoded using an agent communication language (ACL). In order for ontologies to be shared and reused, ontology repositories are needed to store and maintain ontologies. The Otago Ontology Repository is a prototype implementation of a design to allow ontology designers and agents to use open Web standards to publish and retrieve ontol ...

Full text available: 📄 pdf(789.04 KB)   Additional Information: full citation, abstract, citings, index terms

We present a new approach for modeling multi-modal data sets, focusing on the specific case of segmented images with associated text. Learning the joint distribution of image regions and wo has many applications. We consider in detail predicting words associated with whole images (au annotation) and corresponding to particular image regions (region naming). Auto-annotation might help organize and access large collections of images. Region naming is a model of object recognition as a process ...
